Section	Change(s)
Section 2 Required CSIS Data Elements and Valid Codes	Added this section, which includes a listing of all CSIS data elements that are to be used in aggregation document and valid codes for those elements (where applicable).
Section 3 Aggregation Parameters for County District Information Form	Renamed this section. Added *Section Selection Criteria* section, which includes CSIS elements, and criteria that are used in more than one aggregation parameters. Also shows file formats and how records are constructed for use in the aggregation parameters. Consolidated format for defining individual elements. The *Field Identification* and *Data Source Summary* tables were combined into the *CSIS Data Elements Used* table. The *Data Element Use* table was reformatted and renamed to *CDE Data Elements Populated*. Where possible, repeating element definitions (with slight variations in *Additional Criteria*) are combined into a single data element definition, substantially reducing the amount of space used to define elements **Deletions:** 1. 1. Introduction

Purpose

This **Aggregate File Creation Parameters** is intended to provide a clear set of rules and specifications for creating the CDE required aggregate file County District Information Form *(CDIF)* from records submitted by Local Education Agencies (LEAs). This document is under very strict version control and is to be updated and released simultaneously with new releases of the CSIS Data Dictionary, Code Tables, Validation Tables and File Formats.

This document is created and maintained by California Department of Education, Education Demographics Office.

Document Conventions

The title page and header of this document contain a version number in the form X.Y where:

    X is the version number in sequence 1 through N

    Y is the revision number in sequence .1 through .N

The first approved version of the document will be numbered 1.0

Each new version represents substantial change to the document (for example, adding or deleting work products or processes) and will be serially numbered to the left of the decimal (for example 2.0, 3.0,...) once it has been approved by CSIS management.

Minor revisions (that is, format or spelling) will retain the major version number and increment the revision number to the right of the decimal (for example 1.0, 1.1, 1.2,…).

Intended Audience and Reading Suggestions

The primary audience intended to read this document are the technical staff responsible for transitioning the CDE paper based aggregate reporting system to the new State Reporting and Records Transfer System (SRRTS). These are the CDE Program technicians and the programming staff writing the aggregation routines. The software quality assurance staff should also use this document to create test plans.

Readers should first familiarize themselves with the SRRTS System Architecture, SRRTS System Requirements Specification, SRRTS State Reporting Subsystem Architecture and Transmission File Formats prior to reading this document. The reader should be thoroughly familiar with the CSIS Data Dictionary and Code before reading this document.

2. Required CSIS Data Elements and Valid Codes

The following table contains all CSIS data elements (from *CSIS Data Dictionary version 4.1)* and related File formats (from *CSIS File Transmission Formats 2003-2004*) that are used in the creation of the CDE data elements specified in this document. Also included are valid codes for these CSIS data elements where codes are defined either in the *CSIS Data Dictionary version 4.1* or the *CSIS Data Dictionary Code Tables version 4.1*. The codes that are included are only those that are valid for creating CDE data elements in this document and may be a subset of all codes listed in the CSIS reference materials.

>**Related hard copy form:**

>>**Form name** : County District Information Form
>>**Form date:** October 2003

Definitions used in this document:
>*"CBEDS Information Day"* is defined, as Wednesday, October 1, 2003 (first Wednesday in October)
>*"Prior year CBEDS Information Day"* is defined as Wednesday, October 2, 2002 (first Wednesday in October)
>*"following year"* is defined as 2004
>*"Information Day Year" = 2003*

Section Selection Criteria

Each named *Section Selection Criteria* is used in one or more of the *Element Definitions* below.

Section Selection Criteria Name: CDIF-Enroll

These are students enrolled in any school in the district on CBEDS Information Day. Each student is to be counted only once in the school district.

This section defines those elements that are used to describe a unique set of attributes for each CDIF-Enroll. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one CDIF record for each unique set of these elements.

File Format	ID	Name	Criteria
INST GN NULL	14.03	Institution ID	KEY (1st seven digits only)

Record Links: Join the following records together using the following Elements.

INST GN NULL, ENRA SE NULL	14.03 05.03.03	Institution ID School of Enrollment ID	
ENRA SE NULL, DEMO GN NULL, DEMO GN ET, PROG PE NULL	01.02	CSIS Student Number	

Select only those records that meet the following criteria after they have been joined

ENRA SE NULL	05.01	Enrollment Date	On or before CBEDS Information Day
ENRA SE NULL	05.03.02	Institution ID Type	= 1
ENRA SE NULL	05.06	Withdrawal Date	On or after CBEDS Information Day or Blank
ENRA SE NULL	05.09	Dropout Indicator	<> '1'
DEMO GN NULL	05.11	High School Graduation Status	<> (110 or 120 or 170 or 190 or 210 or 220 or 230)

Section Selection Criteria Name: CDIF-Staff

These are classified staff (as specified below) who were employed on CBEDS Information Day. This is the count of "paraprofessional" and "office" staff that work out of the district office. There is an exception to this rule for the "other classified" staff category. If staff in this category serves at more than one school, they **should** be included in this group. Each staff is to be included only once in the district.

Classified staff are to be counted only once in one job category. For a staff person that reports in more than one job classification, use the following rules. Assign the staff to one of the categories among "paraprofessional", "clerical", or "other" based upon the largest percentage of time spent in a category. If there is no classification with a majority, the lowest code reported for *13.03 Job Classification* should be used to determine the category. All of the classified staff time in all classified staff categories should then be attributed to the selected category. For example if a staff reports 35% in "paraprofessional" and 65% in "clerical", the staff should be reported as "clerical" with 100% time.

This section defines those elements that are used to describe a unique set of attributes for each CDIF-Staff. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one CDIF record for each unique set of these elements.

These are Adult Education staff (as specified below) who were employed during the 2002-2003 school year. Each staff is to be included only once in the district. Adult Education Staff may have assignments at either the district or site level and be included in this selection in either case.

This section defines those elements that are used to describe a unique set of attributes for each CDIF-AdultEdStaff. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.
